-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Preliminary Amendment

The preliminary amendment filed 2/19/2004 has been entered.

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: Figure 1 is missing reference 4b as it is described in page 5, line 20. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The abstract is objected to because it exceeds 150 words. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 2877

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites “a driving means or reciprocally moving said article and said light projecting device and photo-sensor device...” However, from the specification and drawings it is clearly understood that the driving device 11 moves only the frame 4, which includes the light projecting device and the photo-detector, and the article is stationary positioned on the glass/transparent plate 2. Therefore the driving means do not move said article. That is also stated in Claims 5 and 11, which recite “the transparent plate is arranged stationary and said light projecting device and photo-sensor are arranged movably in the first direction.” The Examiner suggests deleting the wording “said article” from line 10, 18, and 20 in Claim 1.

Allowable Subject Matter

Claims 1-12 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter:

As to Claim 1, the prior art of record taken alone or in combination, fails to disclose or render obvious a shifting device for shifting said photo-sensor device in said first direction into at least first and second positions which are mutually separated by a distance smaller than a pitch at which said photo-detectors are arranged in array; and a control device for controlling said driving device and shifting device such that when said article and light projecting device and

photo-sensor device are moved by said driving device in a forward direction, said photo-sensor device is in said first position and when said article and light projecting device and photo-sensor device are moved by said driving device in a backward direction, said photo-sensor device is in said second position, in combination with the rest of the limitations of the claim.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Heir et al (US 5,251,156), Claesson et al (US 4,773,029), Keen et al (US 5,469,262), Hammar (us 4,192,613), Kanev (US 4,914,307), Mills et al (6,380,503), and Connely describe various dimension-measuring non-contact devices. .
